Restaurant Pricing Reference - Updated

Two ways to run Tabzy. One transparent rate card for each.

Tabzy now comes in two shapes: the **All-in-One POS**, a full register and kitchen system replacement, or **Tabzy Connect**, which layers ordering, loyalty, and TabzyAI on top of the POS or terminal you already use. Both plans charge nothing on cash, and guests are never charged a surcharge.

1. Choosing Your Plan

Feature	Tabzy All-in-One POS	Tabzy Connect
Best for	Venues wanting a complete POS & register replacement	Venues keeping their existing POS or card reader (e.g. SumUp, Vectron)
Software fee (Months 1-3)	€0/month - free trial	€0/month - first 3 months free
Software fee (Month 4+)	€0/month, forever	€100/month flat
Cash payments	€0 / 0% - free forever	Managed entirely by your existing POS
European cards (Months 1-3)	1.75% + €0.25 (welcome rate)	0% from Tabzy - settled via your terminal provider
European cards (Month 4+)	3.00% + €0.25	0% from Tabzy - settled via your terminal provider
International / business cards	4.75%-4.90% + €0.25	0% from Tabzy - settled via your terminal provider
Guest surcharge	€0.00 - zero diner fee	€0.00 - zero diner fee
Hardware required	Tabzy POS terminal, KDS tablet & QR stands	Your existing POS/terminal + Tabzy table QR stands
Contract term	Month-to-month, cancel anytime	Month-to-month, cancel anytime

Not sure which fits your venue? Most restaurants replacing an aging till or paper tickets choose All-in-One; venues happy with their current terminal usually start with Connect.

2. All-in-One - Full Rate Card

Payment method	First 3 months (welcome rate)	Standard rate (Month 4+)
Monthly base SaaS	€0/month	€0/month
Cash payments	€0 / 0% - free forever	€0 / 0% - free forever
European consumer cards	1.75% + €0.25	3.00% + €0.25
International / business cards	3.40% + €0.25	4.75%-4.90% + €0.25
Guest surcharge	€0.00	€0.00

A small minimum fee may apply on unusually small transactions, so a tiny sale never costs more to process than it earns. This is a restaurant-side fee only - guests are never charged it.

3. Worked Examples - All-in-One

What a restaurant actually pays, at typical bill sizes, on the All-in-One plan.

European cards

Bill	Welcome fee (1.75% + €0.25)	Standard fee (3.00% + €0.25)
€10	€0.425	€0.550
€25	€0.688	€1.000
€40	€0.950	€1.450
€60	€1.300	€2.050
€100	€2.000	€3.250

International / business cards

Bill	Welcome fee (3.40% + €0.25)	Standard fee (4.90% + €0.25)
€10	€0.590	€0.740
€25	€1.100	€1.475
€40	€1.610	€2.210
€60	€2.290	€3.190
€100	€3.650	€5.150

Most restaurants see the majority of transactions land at the European card rate, since most guests pay with domestic or EEA-issued cards. Standard-rate examples use the top of the 4.75%-4.90% international band.

4. Tabzy Connect - Flat Monthly Rate

Item	Months 1-3	Month 4+
Software fee	€0/month - free trial	€100/month flat
Card processing	0% from Tabzy	0% from Tabzy
Guest surcharge	€0.00	€0.00

Card payments on Connect continue to be settled and priced by your existing terminal provider (e.g. SumUp, Vectron) - Tabzy takes no cut of the card transaction itself.

5. Hardware & Setup

Hardware is priced separately from the per-transaction rate, as a one-time purchase based on your venue's needs. Connect venues typically only need the QR stands, since the terminal itself is already in place.

Item	Price
Compact card reader	from €59
Countertop card reader	from €199
Premium wireless reader	from €259
Full terminal unit	from €289
Mobile data (per reader)	€9/month, 10GB cap
Table QR stands (per table)	included with setup

Exact hardware needs and final pricing are confirmed with each restaurant individually based on venue size and setup.

6. What's Included, Every Restaurant

- Unlimited table QR codes and bill splitting
- Worker mobile apps for shift and tip splits
- Digital receipts, TSE-compliant
- Branded online delivery and ordering website
- Table reservations and deposit links
- Loyalty engine, vouchers, and CRM
- Full TabzyAI access and tools
- Multi-branch support and management

All-in-One additionally replaces your register with a live POS and adds kitchen display system (KDS) ticket columns. On Connect, your existing POS or terminal continues to handle checkout and payment.

7. Frequently Asked Questions

Which plan should I pick?

If you're replacing your register, till, or paper tickets, choose All-in-One. If you already have a POS or card terminal you're happy with, Connect adds Tabzy's ordering, loyalty, and AI tools on top without touching how you take payment.

What does Tabzy cost for cash payments?

Nothing, on either plan. Cash is always free, even if a guest uses the app to split the bill.

Do I need new hardware or a terminal?

On All-in-One, most restaurants use a Tabzy-provided card reader or terminal, priced separately as shown above. On Connect, you keep your existing hardware and only add Tabzy's table QR stands.

Are there any hidden fees?

No. The rates shown above are the complete cost for each plan. No setup fee, no minimum contract, and no additional charges beyond the per-transaction rate (or flat fee) and any hardware purchased.

Is there a contract or commitment?

No minimum term on either plan. Restaurants can cancel or switch plans at any time.

This document reflects Tabzy's standard published pricing. Rates are subject to change; the current version is always available at tabzy.de/pricing.
